PROFESSIONAL SUMMARY

Visionary 2nd-year Computer Engineering student and Founder of TechoCore[cite: 318]. Currently architecting "NuroCare" (formerly MediGram), a comprehensive digital health super-app designed to unify the healthcare ecosystem. Expert in full-stack development (Flutter, Supabase, Python) with a focus on solving 98% of real-world medical problems using Artificial Intelligence. Proven ability to lead product development from concept to architecture.

EXPERIENCE

Founder & Product Architect

May 2025 – Present

TechoCore (NuroCare) | Ahmedabad, India

- Leading the mission to solve healthcare fragmentation by creating a single "super app" ecosystem connecting patients, doctors, and government bodies.
- Designed a comprehensive 14-dashboard architecture tailored for stakeholders including Gynaecologists, Ayurvedic Vedyas, and Hospital Admins.
- Developed core AI logic including an AI Symptom Analyzer, Test Report Summarizer, and Disease Heatmap tools for government use.
- Acting as Financial Advisor and Lead Backend Developer, utilizing Supabase and Python to create a scalable medical infrastructure.

Lead Software Developer

July 2025 – Present

Dprofiz Private Limited | Ahmedabad, India

- Leading development for a smart rewarding application focused on waste management and IoT smart trash bins.
- Implementing user engagement strategies and core software logic for the rewards system.

EDUCATION

B.E. Computer Engineering

2024 – 2028

SAL College of Engineering

Higher Secondary (Science)
